

ICEUS, Inc. Industrial and Utility Divisions

Presents

PREP WIPES

SOLVENT SATURATED TOWELS
IN A PLASTIC PAIL WITH A
RECLOSEABLE DISPENSER TOP

EACH PREP WIPES PAIL CONTAINS
250 SOLVENT SATURATED, PULLUP,
TEAR AWAY, NON-LINTING TOWELS
[EACH TOWEL IS 7.5" x 14"]

PREP WIPES: Engineered for maximum economy, ease of application, and optimum cleaning performance. Each **Prep Wipe** pail may be filled with your choice of ICEUS, Inc.'s **Industrial** or **Utility** solvents

What can PREP WIPES do for you?

REDUCE COSTS: When using standard solvent containers, much of what is purchased never gets to the item to be cleaned. Solvent loss occurs through evaporation, spillage, over saturation of toweling, etc. **Prep Wipes** are saturated in the factory with just the right amount of solvent to ensure that there is no waste. While experience varies, studies have shown that using **Prep Wipes** reduces solvent loss by as much as 45%. Towel costs are a major part of the overall cleaning expense. By providing the exact number of towels needed for the exact amount of solvent, excess towel purchases are also eliminated.

REDUCE INVENTORY: Many facilities carry three inventory items in association with wipe on/wipe off solvent cleaning: solvent, towels, and dispensing containers. All of these items may not be supplied by the same vendor and, in some instances, may not be compatible or ideally suited to be used in conjunction with each other. **Prep Wipes** eliminates these problems by matching the towels to the solvent and by consolidating three items into one part number from one vendor.

ENSURE RESIDUE FREE SURFACES:

The specification for how clean a part or surface needs to be is crucial to the next manufacturing phase. Solvents are normally required to evaporate completely and leave no residue behind [typically less than 100 ppm, non-volatile residue]. Most ordinary toweling will leave a residue behind in the form of lint or fibers. Toweling may also leave soap or lubricant residue released from the towel by the action of the solvent. Often the toweling is overlooked when specifications for residue free surfaces are created. **Prep Wipes** toweling has been tested and proven to be non-linting and residue free when used in conjunction with ICEUS, Inc.'s solvent products.

INCREASED SAFETY: Solvent liquids have the potential for spills onto users, clothing, floors, equipment, etc. Spills can create OSHA or EPA problems. The necessity to have spill cleanup materials on hand for such problems can be expensive. By providing the correct

amount of measured solvent on each towel, you can eliminate this safety issue.

REDUCE VOC EMISSIONS: Many states have VOC regulations. The legislated initiative is to minimize overall VOC emissions through a reduction in the pounds of VOC solvents purchased. **Prep Wipes** can reduce pounds of solvent purchased by as much as 65%, while providing the same cleaning performance over the same amount of surface area.

REDUCE WASTE: the removal of waste solvent, or empty metal pails and drums, has become a problem in many localities. **Prep Wipes** addresses this problem by eliminating the liquid waste and empty metal containers. **Prep Wipes** plastic pails are recyclable and the toweling is biodegradable. Providing the contamination on the towel is not a hazardous substance, the towels can be put in ordinary containers.

ITEM#	DESCRIPTION	PACKAGING	SHIPPING WEIGHT
___-PW-250	7.5" x 14" saturated wipes in a pop up bucket	1 buckets (250 Wipes)	11 lbs
