The SMARTSOLV Line!

A Range of Engineered Solvent Products
Designed to Target Specific Contaminates

SMARTSOLV-EC

SMARTSOLV-EC is an operator safe, 100% volatile, industrial strength, environmentally responsible, solvent blend. It is designed to safely remove partially cured epoxies, urethanes, varnishes, lacquers, shellac, and latex, acrylic, and enamel paints and coatings. It contains no methylene chloride or NMP. All components of **SMARTSOLV-EC** are readily biodegradable.

SMARTSOLV-EC evaporates slower than water and will continue to break down the bonds of multiple layers the longer it sits on a surface.

SMARTSOLV-EC is not designed to be mixed or diluted with water.

SMARTSOLV-EC has a slight, citrus odor that is not overpowering. The product is classified as a possible “slight skin irritant” and it will remove oils from skin. Solvent resistant gloves are recommended.

SMARTSOLV-EC is non-corrosive to unpainted metals.

SMARTSOLV-EC has a Tag Closed Cup (ASTM D-56) flash point of < 160°F giving it an OSHA classification III. In containers of less than 119 gallons, it is not regulated by the D.O.T.

SMARTSOLV-EC has a very low surface tension and will flow into the smallest cracks and crevices in a surface. Caution should be used when applying to a vertical surface in order to eliminate excess run off.

SMARTSOLV-EC is available in 55 gallon steel drums. Special packaging is available if volume warrants.

ITEM#	DESCRIPTION	PACKAGING	SHIPPING WEIGHT
SS-EC-55	55 gallon steel drum	1 drum	540 LBS
SS-EC-PW-250	7.5" x 14" saturated wipes in a pop up bucket	1 bucket (250 wipes)	11 LBS
