

ICEUS, Inc. Industrial Division

Presents

The TECHSOLV Line!

A Range of Engineered Solvent Products Designed for
Industrial Applications

TECHSOLV-INDUSTRIAL GRADE

**TECHSOLV-IG is a 100% volatile solvent blend,
engineered to accommodate most industrial
degreasing applications**

TECHSOLV-IG evaporates in 1 to 3 minutes when wiped or blown to a thin film, leaving typically less than 100 ppm non-volatile residue. In open containers, its evaporation rate is slightly faster than water. This quick evaporation rate ensures that **TECHSOLV-IG** will not interfere with the next manufacturing process.

TECHSOLV-IG has a Tag Closed Cup flash point of $>112^{\circ}\text{F}$ [per ASTM D56], giving it an OSHA classification of combustible class III.

TECHSOLV-IG, in containers of less than 119 gallons, is not regulated by the DOT. It is classified as non hazardous by the RCRA in its unopened state; therefore, depending on the classification of the contaminate, it does not require the use of hazardous chemical waste handling and disposal methods or procedures.

TECHSOLV-IG was engineered with operator safety as a prime consideration. It has a slight citrus odor which is non-evasive. It contains no toxic SARA 313 reportable substances and carries a NPCA-HIMIS rating of 1 [slight health].

The **TECH-SOLV-IG** formulation base has amassed over 15 years of industrial use history in some of North America's largest corporations and utilities without any adverse effects being reported from their health or environmental departments.

TECHSOLV-IG is based on a formula that has been used in industry since 1989. The formula has passed strict aircraft compatibility testing on metals, plastics, paints, coatings, and laminates, and proven its cleaning effectiveness in removing hundreds of contaminants in various industrial cleaning processes, such as: wipe on/wipe off, dip tanks, spray booth, baths, parts cleaners, etc.

TECHSOLV-IG is a non-conductive liquid with a very high basic insulation level [BIL]. The base formula has been tested extensively to ensure it has no adverse effect on the plastics, rubbers, and composites that are used in the manufacture of electrical and communication cable and their components.

TECHSOLV-IG is available in packaging that meets most industrial situations. It may be purchased in 55 Gallon Non-Conductive Recyclable Plastic Drums, and 5 Gallon Plastic Pails with Pour Spouts. Specialty packaging is available if volume warrants.

TECHSOLV-IG has been used in power and communication industries worldwide. For that reason, it is often the solvent of choice for industrial, electrical, and communications maintenance and construction departments.

| ITEM# | DESCRIPTION | PACKAGING | SHIPPING WEIGHT |
|---------------------|--|-----------------------------|------------------------|
| TS-IG-55 | 55 gallon plastic drum | 1 drum | 385 LBS |
| TS-IG-05 | 5 gallon plastic pail | 1 pail | 36 LBS |
| TS-IG-32 | 32 ounce bottles w/squirt tops | 12 bottles | 22 LBS |
| TS-IG-PW-250 | 7.5" x 14" saturated wipes in a pop up bucket | 1 bucket (250 wipes) | 11 LBS |
